NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

NOTE A – BASIS OF PRESENTATION

The consolidated financial statements include the accounts of Matrix Service Company (“Matrix”) and its subsidiaries, all of which are wholly owned. All significant inter-company balances and transactions have been eliminated in consolidation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with Rule 10-01 of Regulation S-X for interim financial statements required to be filed with the Securities and Exchange Commission and do not include all information and footnotes required by generally accepted accounting principles for complete financial statements. However, the information furnished reflects all adjustments, consisting only of normal recurring adjustments that are, in the opinion of management, necessary for a fair statement of the results for the interim periods.

The accompanying financial statements should be read in conjunction with the audited financial statements for the year ended May 31, 2002, included in Matrix’s Annual Report on Form 10-K for the year then ended. Matrix’s business is seasonal; therefore, results for any interim period may not necessarily be indicative of future operating results.

Other comprehensive loss	0	(140)	(181)	(303)
Comprehensive income	1,740	1,457	3,135	2,487

NOTE D – INCOME TAX

Deferred income taxes are computed using the liability method whereby deferred tax assets and liabilities are recognized based on temporary differences between financial statement and tax basis of assets and liabilities using presently enacted tax rates.

NOTE E – NEW ACCOUNTING STANDARDS

The Financial Accounting Standards Board (FASB) issued SFAS No. 141, "Business Combinations" and SFAS No. 142, "Goodwill and Other Intangible Assets" in June 2001. SFAS No. 141 establishes accounting and reporting standards for business combinations and requires all business combinations to be accounted for by the purchase method. The Statement is effective for all business combinations initiated after June 30, 2001, and any business combinations accounted for using the purchase method for which the date of acquisition is July 1, 2001, or later. SFAS No. 142 addresses accounting and reporting standards for goodwill and other intangible assets. Under the provisions of this Statement, goodwill and intangible assets with indefinite useful lives are no longer amortized, but will be tested annually for impairment. Matrix applied the new rules on accounting for goodwill and other intangible assets beginning June 1, 2002. Application of the nonamortization provisions of the Statement would have resulted in no change in prior years basic and fully diluted earnings per share for the three months ended November 30, 2002 and \$0.38 and \$0.36 respectively, for the six months ended November 30, 2002. On August 31, 2002, Matrix completed the impairment tests of goodwill as of June 1, 2002. The results of these tests have indicated that there was no impairment impact in adopting this standard.

The FASB issued SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" in October, 2001. This Statement supersedes SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of," and amends Accounting Principles Board Opinion No. 30, "Reporting the Results of Operations- Reporting the Effects of Disposal of a Segment of a Business and Extraordinary, Unusual and Infrequently Occurring Events and Transactions." The Statement retains the basic framework of SFAS No. 121, resolves certain implementation issues of SFAS No. 121, extends applicability to discontinued operations, and broadens the presentation of discontinued operations to include a component of an entity. The Statement is being applied prospectively, beginning June 1, 2002. Initial adoption of the Statement did not have any impact on Matrix results of operations or financial position.

NOTE F – DEBT

At November 30, 2002, \$5.1 million was outstanding under the Company's \$20 million revolving bank credit agreement, with \$5.0 million at a LIBOR interest rate of 2.71% and \$0.1 million at a prime interest rate of 3.375%. There was \$14.9 million remaining in availability with \$4.0 million utilized by outstanding letters of credit which mature in 2004. At November 30, 2002, the balance on the term loan stands at \$5.4 million at a LIBOR interest rate of 3.91%. The interest rate swap liability resulted in \$0.4 million included in long-term debt.

NOTE G – CONTINGENCIES

As of November 30, 2002, accounts receivable and costs and estimated earnings in excess of billings on uncompleted contracts included revenues for unapproved change orders of approximately \$0.7 million and claims of approximately \$1.9 million. Generally, amounts related to unapproved change orders and claims will not be paid by the customer to Matrix until final resolution of related claims or litigation, and accordingly, collection of these amounts may extend beyond one year.

The Company is currently in litigation in the Tulsa County district court for the State of Oklahoma over matters arising out of its worker's compensation program with a former insurance provider. These matters involve contests over certain collateral pledged to secure Matrix's obligations under this prior program. The defendants filed a motion to transfer venue to the courts in Bermuda. A hearing on this motion and on whether current court ordered restraints on the collateral will remain in place was to be held on October 30, 2002. Prior to that time, the parties agreed to stay the motion. Venue was left in Tulsa County and the restraints on the collateral were left in place with the parties agreeing to negotiate terms satisfactory to both sides. The Company is vigorously defending against this matter and it is the opinion of management that this legal action will not have a material effect on the Company's financial position.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward Looking Statements

Certain matters discussed in this report include forward-looking statements. Forward-looking statements can generally be identified or recognized as those statements predicated upon or preceded by words such as "believe," "expect", "plan", or "should" and like words of similar affect. Matrix is making these forward-looking statements in reliance on the "safe harbor" protections provided under the Private Securities Litigation Reform Act of 1995.

Forward-looking statements are subject to a number of uncertainties that could cause actual results to differ materially from any results projected, forecasted, estimated, or budgeted, including the following:

- Delays or reductions in customer maintenance budget spending as customer resources are shifted towards capital budget spending for clean fuel projects.
- The timing and planning of maintenance projects at customer facilities in the refinery industry which could cause comparisons of results in one period to another to differ materially.
- Changes in general economic conditions in the United States.
- Changes in laws and regulations to which Matrix and its customers are subject, including tax, environmental, and employment laws and regulations which could cause increased costs to Matrix, a decline in customer demand for services designed to meet new laws and regulations and a decline in the amount of services outsourced by customers.
- The cost and effects of legal and administrative claims and proceedings against Matrix or its subsidiaries.
- Conditions of the capital markets Matrix utilizes to access capital to finance operations.
- The ability to raise capital in a cost-effective way.
- The effect of changes in accounting policies.
- The ability to manage growth and to assimilate personnel and operations of acquired businesses.
- The ability to control costs.
- Severe weather which could cause project delays and/or a decline in labor productivity.
- Changes in foreign economies, currencies, laws, and regulations, especially in Canada where Matrix has made direct investments.
- Political developments in foreign countries, especially in Canada where Matrix has made direct investments.
- The ability of Matrix to develop expanded markets and product or service offerings as well as its ability to maintain existing markets.
- The ability of Matrix to develop a learning curve in bidding and managing projects in a new industry.
- Technological developments, high levels of competition, lack of customer diversification, and general uncertainties of governmental regulation in the energy industry.
- The ability to recruit, train, and retain an adequate number of project supervisors with substantial experience.
- A downturn in the petroleum storage operations or hydrocarbon processing operations of the petroleum and refining industries.
- Changes in the labor market conditions that could restrict the availability of workers or increase the cost of such labor.
- The negative effects of a strike or work stoppage.
- Exposure to construction hazards related to the use of heavy equipment with attendant significant risks of liability for personal injury and property damage.
- The risk of using significant production estimates for determining percent complete on construction contracts could differ materially upon final determination of project scope.
- The inherent inaccuracy of estimates used to project the timing and cost of exiting operations of non-core businesses.
- Fluctuations in quarterly results.

Results of Operations

Consolidated Overview

Matrix operates in three segments – AST Services, Construction Services and Plant Services. All operations are contained within these segments, therefore, significant fluctuations in gross revenues, gross profits, selling, general and administrative costs and operating income will be discussed below by segment.

Other income in the first six months of 2003 consists mainly of \$0.2 million in proceeds from an insurance settlement for flood damage sustained in the previous year in Houston.

The effective tax rates for the six months ended November 30, 2002 and 2001 were 38.0% and 38.2% respectively.

Three Months Ended November 30, 2002 Compared to Three Months Ended November 30, 2001

AST Services Fiscal Year 2003 vs. 2002

Gross revenues for AST Services for the quarter ended November 30, 2002 were \$44.6 million, compared to \$43.9 million for the comparable quarter of the prior year, an increase of \$0.7 million or 1.6%. This increase was primarily due to higher repair, maintenance and new tank construction activity offset by a decline in product sales. Gross margin for the quarter ended November 30, 2002 of 12.8% was worse than the 13.7% margin produced for the quarter ended November 30, 2001 as the mix of higher margin outside product sales declined relative to the prior year. The increased sales volume offset by lower margins year over year resulted in gross profit for the quarter ended November 30, 2002 of \$5.7 million being less than the \$6.0 million produced for the quarter ended November 30, 2001 by \$0.3 million or 5.0%

Selling, general and administrative costs as a percent of revenues increased to 8.1% for the quarter ended November 30, 2002 vs. 6.1% for the quarter ended November 30, 2001 primarily as a result of higher fixed salary costs.

Operating income and income before income tax expense for the quarter ended November 30, 2002 of \$2.1 million and \$2.2 million respectively, were worse than the \$3.3 million and \$3.3 million respectively produced for the quarter ended November 30, 2001, primarily as the result of the lower margins and higher selling, general and administrative costs discussed above.

Construction Services Fiscal Year 2003 vs. 2002

Gross revenues for Construction Services for the quarter ended November 30, 2002 were \$11.0 million, compared to \$6.0 million for the comparable quarter of the prior year, an increase of \$5.0 million or 83.3%. This increase resulted from the refocus towards Matrix' core client base which has resulted in increased project opportunities. Gross margin for the quarter ended November 30, 2002 of 14.5% was significantly better than the 10.0% produced for the quarter ended November 30, 2001 as a direct result of better job execution of a higher margin backlog. This margin improvement along with increased sales volume resulted in gross profit for the quarter ended November 30, 2002 of \$1.6 million being \$1.0 million better than the \$0.6 million for the quarter ended November 30, 2001.

Operating income and income before income tax expense for the quarter ended November 30, 2002 of \$0.9 million and \$0.9 million respectively, were better than the \$0.2 million and \$0.1 million produced in the quarter ended November 30, 2001, primarily as the result of revenue and gross margin improvements discussed above.

Plant Services Fiscal Year 2003 vs. 2002

Gross revenues for Plant Services for the quarter ended November 30, 2002 were \$4.4 million compared to \$4.8 million for the comparable quarter of the prior year, a decrease of \$0.4 million or 8.3%. This decrease resulted from slightly more turnaround work in the second quarter of last year versus the second quarter of this year. Gross margin for the quarter ended November 30, 2002 of 6.8% was better than the 6.3% produced for the quarter ended November 30, 2001 as a result of a more favorable mix of business. These margin improvements offset by the decreased sales volume resulted in gross profit for the quarter ended November 30, 2002 of \$0.3 million being identical to the \$0.3 million for the quarter ended November 30, 2001.

Operating loss and loss before income tax expense for the quarter ended November 30, 2002 of \$(0.3) million and \$(0.3) million respectively, were relatively consistent with the operating loss and loss before income tax expense of \$(0.2) million and \$(0.2) million respectively produced for the quarter ended November 30, 2001.

Six Months Ended November 30, 2002 Compared to Six Months Ended November 30, 2001

AST Services Fiscal Year 2003 vs. 2002

Gross revenues for AST Services for the six months ended November 30, 2002 were \$87.2 million, compared to \$82.4 million for the comparable six months of the prior year, an increase of \$4.8 million or 5.8%. The increase was due primarily to a strong business environment in the Western and Eastern tank repair and maintenance regions. Gross margin for the six months ended November 30, 2002 of 13.1% was slightly worse than the 13.6% produced for the six months ended November 30, 2001 as a result of a decline in higher margin product sales relative to the prior year. The increased sales volume offset by the gross margin declines resulted in gross profit for the six months ended November 30, 2002 of \$11.4 million being \$0.2 million or 1.8% better than the \$11.2 million for the six months ended November 30, 2001.

Selling, general and administrative costs as a percent of revenues increased to 7.8% in the six months ended November 30, 2002 versus 6.5% in the six months ended November 30, 2001 primarily as a result of higher fixed salary costs.

Operating income and income before income tax expense for the six months ended November 30, 2002 of \$4.5 million and \$4.8 million respectively, were worse than the \$5.7 million and \$5.6 million respectively produced for the six months ended November 30, 2001, primarily the result of the higher selling, general and administrative costs discussed above.

Construction Services Fiscal Year 2003 vs. 2002

Gross revenues for Construction Services for the six months ended November 30, 2002 were \$18.6 million, compared to \$9.9 million for the comparable six months of the prior year, an increase of \$8.7 million or 87.9%. This increase was due to better business development practices with our core customer base. Gross margin for the six months ended November 30, 2002 of 14.0% was a significant improvement over the 9.1% gross margin produced for the six months ended November 30, 2001 as a direct result of better absorption of fixed costs associated with the higher revenue volume and a favorable mix of projects in the current fiscal year. This gross margin improvement along with the increased sales volume resulted in gross profit for the six months ended November 30, 2002 of \$2.6 million being \$1.7 million better than the \$0.9 produced in the six months ended November 30, 2001.

Operating income and income before taxes for the six months ended November 30, 2002 of \$1.4 million and \$1.4 million respectively, were significantly better than the operating income and income before income taxes of \$0.2 million and \$0.1 million respectively, produced for the six months ended November 30, 2001, primarily as the result of the increased revenues and improved gross margins discussed above.

Plant Services Fiscal Year 2003 vs. 2002

Gross revenues for Plant Services for the six months ended November 30, 2002 were \$8.4 million compared to \$10.2 million for the comparable six months of the prior year, a decrease of \$1.8 million or 17.6%. The revenue decrease in Plant Services was due to lower maintenance and turnaround work in the first quarter of this year. Gross margin for the six months ended November 30, 2002 of 3.6% was worse than the 6.9% produced for the six months ended November 30, 2001 as a direct result of less absorption of fixed costs due to the lower volumes. These volume and margin declines resulted in gross profit for the six months ended November 30, 2002 of \$0.3 million being \$0.4 million or 57.1% worse than the \$0.7 million produced for the six months ended November 30, 2001.

Operating loss and loss before income tax expense for the six months ended November 30, 2002 of \$(0.8) million and \$(0.9) million respectively, were worse than the operating loss and loss before income taxes of \$(0.5) million and \$(0.6) million respectively produced in the six months ended November 30, 2001, primarily as the result of the gross profit declines discussed above.

Financial Condition & Liquidity

Matrix's cash and cash equivalents totaled approximately \$1.2 million at November 30, 2002 and \$0.8 million at May 31, 2002.

Matrix has financed its operations recently with cash from operations and from advances under a credit agreement. Matrix has a credit agreement with a commercial bank under which a total of \$20.0 million may be borrowed on a revolving basis based on the level of Matrix's eligible receivables and costs in excess of billings. Matrix can elect revolving loans which bear interest on a Prime or LIBOR based option and mature on October 31, 2004. At November 30, 2002, \$5.1 million was outstanding under the revolver with \$5.0 million at a LIBOR interest rate of 2.71% and \$0.1 million at a prime interest rate of 3.375%. There was \$14.9 million remaining in availability with \$4.0 million utilized by outstanding letters of credit which mature in 2004. The agreement requires maintenance of certain financial ratios, limits the amount of additional borrowings and the payment of dividends. The credit facility is secured by all accounts receivable, inventory, intangibles, certain real property, and proceeds related thereto.

In fiscal 2002, the Company also borrowed \$5.9 million under a term loan that matures June 6, 2006. The term loan is secured by a mortgage on certain facilities under construction at the Port of Catoosa in Oklahoma. The term loan bears interest at LIBOR + 1.5%.

Effective June 1, 2001, the Company entered into an interest rate swap agreement for an initial notional amount of \$6 million with a commercial bank, effectively providing a fixed interest rate of 7.23% for the five year period on the term note. The company will pay 7.23% and receive LIBOR + 1.5%, calculated on the notional amount. Net receipt or payments under the agreement will be recognized as an adjustment to interest expense. The related debt was initially drawn under the credit agreement revolving loan, and was rolled into the term loan on September 26, 2001. At November 30, 2002, the balance on the term loan stands at \$5.4 million at a LIBOR interest rate of 3.91%. The swap agreement expires in 2006. If LIBOR decreases, interest payments received and the market value of the swap position decrease.

Operations of Matrix provided \$5.4 million of cash for the six months ended November 30, 2002 as compared with the use of \$3.1 million of cash for the six months ended November 30, 2001, representing an increase of approximately \$8.5 million. The increase was due primarily to increased net income and reduced working capital needs.

Capital expenditures during the six months ended November 30, 2002 totaled approximately \$8.0 million. Of this amount, approximately \$4.9 million was used in the construction of the Port of Catoosa facility, \$0.9 million was used to purchase transportation equipment for field operations, and approximately \$1.4 million was used to purchase welding, construction, and fabrication equipment. Matrix invested approximately \$0.6 million in office equipment, computer hardware and software, and furniture and fixtures during the quarter. Matrix has budgeted approximately \$15.8 million for capital expenditures for fiscal 2003 of which \$7.3 million is included for the Tulsa Port of Catoosa construction. Matrix signed a 40-year lease for a 50-acre facility planned in Tulsa, Oklahoma in order to consolidate Matrix's four facilities in the Tulsa market now containing fabrication, operations and administration. Currently, the Tank Construction Division and Tulsa Regional office have relocated to the Port of Catoosa in a new 33,000 square foot facility and construction is in progress on the new 153,000 square foot fabrication facility. On September 27, 2002, Caldwell exercised the \$1.7 million option to acquire Brown Steel Contractors, Inc. ("Brown").

Matrix believes that its existing funds, amounts available from borrowings under its existing credit agreement and cash generated by operations will be sufficient to meet the working capital needs through fiscal 2003 and for the foreseeable time thereafter.

The preceding discussion contains forward-looking statements including, without limitation, statements relating to Matrix's plans, strategies, objectives, expectations, intentions, and adequate resources, that are made pursuant to the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. Readers are cautioned that such forward-looking statements contained in the financial condition and liquidity section are based on certain assumptions, which may vary from actual results. Specifically, the capital expenditure projections are based on management's best estimates, which were derived utilizing numerous assumptions of future events.

Outlook

The current turnaround schedule at Plant Services suggests that the third and fourth quarters will show improved sales volumes and profitability over the first six months of fiscal 2002 but below original forecasts as refineries consolidate their turnaround schedules to coordinate capital construction work associated with low sulfur fuel projects. Matrix's AST Services activity is currently quiet as our clients are in the process of approving calendar 2003 maintenance and capital budgets. It is unclear, however, whether or not the maintenance budgets will be approved at levels comparable, greater or lower in the upcoming calendar year of 2003 in light of current oil and gas prices, mandated capital requirements, and the world recessionary economy. Management believes, however, that its strategic alliances put Matrix in a more favorable position than our competition if budgets are either reduced or increased.

Environmental

Matrix is a participant in certain environmental activities in various stages involving assessment studies, cleanup operations and/or remedial processes.

In connection with the Company's sale of Brown and affiliated entities in 1999, an environmental assessment was conducted at Brown's Newnan, Georgia facilities. The assessment turned up a number of deficiencies relating to storm water permitting, air permitting and waste handling and disposal. An inspection of the facilities also showed friable asbestos that needed to be removed. In addition, Phase II soil testing indicated a number of volatile organic compounds, semi-volatile organic compounds and metals above the State of Georgia notification limits. Ground water testing also indicated a number of contaminants above the State of Georgia notification limits.

Appropriate State of Georgia agencies have been notified of the findings and corrective and remedial actions have been completed, are currently underway, or plans for such actions have been submitted to the State of Georgia for approval on the remaining property. The total cost for cleanup and remediation was \$2.1 million, an insignificant amount of which remains accrued at November 30, 2002.

Matrix closed or sold the business operations of its San Luis Tank Piping Construction Company, Inc. and West Coast Industrial Coatings, Inc. subsidiaries, which are located in California. Although Matrix does not own the land or building, it would be liable for any environmental exposure while operating at the facility, a period from June 1, 1991 to the present. At the present time, the environmental liability that could result from the testing is unknown, however, Matrix has purchased a pollution liability insurance policy with \$5.0 million of coverage for all operations.

Matrix has other fabrication operations in Tulsa, Oklahoma; Bristol, Pennsylvania; and Orange, California which could subject the Company to environmental liability. It is unknown at this time if any such liability exists, but based on the types of fabrication and other manufacturing activities performed at these facilities and the environmental monitoring that the Company undertakes, Matrix does not believe it has any material environmental liabilities at these locations.

Matrix builds aboveground storage tanks and performs maintenance and repairs on existing aboveground storage tanks. A defect in the manufacturing of new tanks or faulty repair and maintenance on an existing tank could result in an environmental liability if the product stored in the tank leaked and contaminated the environment. Matrix currently has liability insurance with pollution coverage of \$1 million, but this amount could be insufficient to cover a major claim.

ITEM 4. Controls and Procedures

We maintain controls and other procedures that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. In response to recent legislation, we implemented changes to our disclosure controls and procedures, primarily to formalize and document procedures already in place and to establish a disclosure committee consisting of some of our officers and other management.

Within the 90-day period prior to our filing of this report, and under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of the design and operation of these disclosure controls and procedures. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective.

We do not expect that our disclosure controls and procedures or our other internal controls can prevent all error and all fraud or that our evaluation of these controls and procedures can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. The benefits of controls and procedures must be considered relative to their costs, and the design of any system of controls is based in part upon assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls and procedures may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of these and other inherent limitations in controls and procedures, misstatements or omissions due to error or fraud may occur and not be detected.

Subsequent to the date of our evaluation described above, we have not made any significant changes, including corrective actions with regard to significant deficiencies or material weaknesses, in our internal controls or in other factors that could significantly affect these controls.

PART IV
OTHER INFORMATION

ITEM 4. Submission of Matters to a Vote of Security Holders:

The Company's annual meeting of stockholders was held in Tulsa, Oklahoma at 10:30 a.m. local time, on Tuesday, October 22, 2002. Proxies for the meeting were solicited pursuant to Regulation 14 under the Securities Exchange Act of 1934, as amended. There was no solicitation in opposition to the nominees for election as directors as listed in the proxy statement, and all nominees were elected.

Out of a total of 7,864,658 shares of the Company's common stock outstanding and entitled to vote, 7,393,627 shares were present at the meeting in person or by proxy, representing approximately 94.0 percent. Matters voted upon at the meeting were as follows:

- a. Election of six directors to serve on the Company's board of directors. Messrs. Bradley, Hall, Hendrix, Lackey, Vetal and Zink were elected to serve until the 2003 Annual Meeting. The vote tabulation with respect to each nominee was as follows:

<u>Nominee</u>	<u>For</u>	<u>Authority Withheld</u>
Hugh E. Bradley	7,349,157	44,470
Michael J. Hall	7,385,857	7,770
I. Edgar Hendrix	7,349,432	44,195
Paul K. Lackey	7,350,457	43,170
Bradley S. Vetal	6,854,782	538,845
John S. Zink	7,376,457	17,170

- b. The stockholders ratified the appointment of Ernst & Young LLP as the Company's independent public accountants.

<u>For</u>	<u>Number of Votes Cast</u>			<u>Broker Non-Votes</u>
	<u>Against</u>	<u>Abstain</u>		
7,388,227	3,700	1,700		-0-

ITEM 6. Exhibits and Reports on Form 8-K:

- A. Exhibit 10.1: Section 906 Certification – CEO
Exhibit 10.2: Section 906 Certification – CFO
- B. Reports on Form 8-K: None.

Signature

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

ITEM 4. Controls and Procedures

CERTIFICATIONS

I, Bradley S. Vetal, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Matrix Service Company;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a. Designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b. Evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c. Presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a. All significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Exhibit 10.1

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report of Matrix Service Company, Inc. (the "Company") on form 10-Q for the period ended November 30, 2002 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I Bradley S. Vetal, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that based on my knowledge:

1. The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and result of operations of the Company.

This certification is deemed to accompany this Quarterly Report on Form 10-Q, but is not deemed "filed" for purpose of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise.
