TULSA, Okla., Feb. 5, 2014 (GLOBE NEWSWIRE) -- **Matrix Service Company** (Nasdaq:MTRX) today reported its financial results for the second quarter and six months ended December 31, 2013. ### Impact of Previously Announced Acquisition to Earnings

As previously announced, on December 21, 2013 the Company completed the acquisition of Kvaerner North American Construction, a premier provider of capital construction and maintenance services to power generation, integrated iron and steel, and industrial process facilities in North America. Since this acquisition occurred late in the fiscal quarter, acquisition related revenues and earnings were not significant. However, the Company recorded a charge to selling, general and administrative costs of \$2.0 million for transaction related fees.

John Hewitt, President and CEO of Matrix Service Company said, "Our second quarter results are visible indications of the progress we are achieving toward our strategic plan and the hard work of our talented employees, which is clearly demonstrated by our record revenues and improving margins. Our liquidity position remains strong and continues to provide us with the necessary resources to achieve both our short and long-term business objectives. The recent acquisition significantly enhances our capabilities and geographic footprint and will enable us to continue to grow the business, particularly in the Electrical Infrastructure and Industrial segments."

# **Backlog**

We define backlog as the total dollar amount of revenues that we expect to recognize as a result of performing work that has been awarded to us through a signed contract, notice to proceed or other type of assurance that we consider firm. The following arrangements are considered firm:

- fixed-price awards;
- minimum customer commitments on cost plus arrangements; and
- certain time and material arrangements in which the estimated value is firm or can be estimated with a reasonable amount of certainty in both timing and amounts.

For long-term maintenance contracts and other established arrangements, we include only the amounts that we expect to recognize into revenue over the next 12 months. For all other arrangements, we calculate backlog as the estimated contract amount less revenues recognized as of the reporting date.

The following table provides a summary of changes in our backlog for the three months ended December 31, 2013:

	Electrical	Oil Gas &	Storage
